Tecumseh Introduces New Masterflux® Compressor and Chiller Solutions

Tecumseh Products Company continues its advance to the leading edge of cooling technology with its new Masterflux® Eclipse direct current compressors and Sierra chiller units.

The new Masterflux Eclipse direct-current compressor is a 48-volt variable speed model rated at 5,600 BTU with refrigerant R134a. It is the first DC powered reciprocating compressor on the market in this size range and is specifically designed for the telecommunications industry's cellular tower electronics and battery cooling applications.

The new Masterflux Sierra Chiller Unit is a complete 12V direct-current chiller rated at 5,000 BTU with R134a refrigerant for process cooling in both stationary and mobile applications. It features a completely integrated system and simple control scheme designed specifically for rugged environments. The new chiller unit can be powered from a universal power supply.

Masterflux variable speed, direct-current compressors and condensing units are designed to meet a wide spectrum of cooling applications. These include heavy-duty trucking, automotive, medical and scientific, mass transit, solar and off-grid power, military and electronics. High power, compact design and high efficiency are the hallmarks of the entire Masterflux product line.

For more information on Tecumseh products, visit www.tecumseh.com.

Founded in 1934, Tecumseh Products Company is a leading global manufacturer of hermetic reciprocating, rotary and scroll compressors ranging in capacity from 1/15th to 6 horsepower, as well as offering a complete line of condensing units and systems for use in residential and commercial refrigeration and air conditioning applications. Tecumseh products are manufactured on four continents and sold globally through a network of sales professionals, authorized wholesalers and licensed distributors offering brand names that include: Celseon®, L'Unite Hermetique®, Masterflux®, Silensys®, and Wintsys®. Tecumseh Products Company is headquartered in Ann Arbor, Michigan. For more information, visit our website at www.tecumseh.com
